## Consulting Services

**Wood Resources International (WRI)**, an internationally recognized forest industry consulting firm established in 1987, has successfully completed more than 180 consulting assignments in over 35 countries worldwide. The company is committed to continuing its international consulting services to the paper and wood products industries by focusing on its area of expertise: on-site evaluations of forest resources and forest products industries worldwide.

The company has, for 15 years, maintained its successful concept of combining forest resource cost analysis from the company's market reports with the information in the company's World Fiber Database, thus providing a unique knowledgebase, which can be utilized for consulting assignments. This Database, one of the most extensive forest resource and wood utilization databases in the world, includes natural and plantation forest information, forest industry parameters, and wood cost data for the principal forest industry regions of the world, and is extensively used in support of consulting projects.

Because of our perspective, confidentiality, and efficiency, WRI has conducted consulting projects predominantly for clients in the private sector worldwide, but also for multiple organizations such as World Bank, the EU Commission, FAO, WWF, AF&PA and USAID, to name a few. Wood Resources International uses a flexible network of highly qualified consultants based in many countries, which allows us to respond to clients' information needs in a timely and cost-effective manner. Areas of expertise include:

### **Forest Resource Economics:**

- Wood Fiber Cost and Availability Analysis
- Resource/Forest Product Analysis
- Global Wood Fiber Economics and Trade Flows

### **Market Studies:**

- Product or Regional Focus
- Pulpwood, Sawlogs, Residuals, Lumber, Wood-based Panels and Secondary Products
- Competitor Analysis and Product/Market Positioning

### **Strategic Planning and Financial Analysis:**

- Wood Fiber Cost Forecasts
- Global Timber Supply and Demand Forecasts

The company also publishes multi-client studies concerning issues of importance to participants of the increasingly global forest product industry. For example, in recent years, the following multi-client studies have been published:

- Trade Outlook for Forest Products in the Pacific Rim to 2010
- The International Woodchip and Pulplog Trade Review, 2003 Edition
- Eucalyptus: Progress in Higher Value Utilization, A Global Review
- The Global Timber Supply/Demand Balance to 2030: Has the Equation Changed?

## Subscription Services

**Wood Resources International (WRI)**, offers two quarterly reports tracking the development of global wood fiber markets:

### “Wood Resource Quarterly”

Wood Resource Quarterly (WRQ), *the* source for global wood fiber price data and market information, is now in its 17th year with significantly expanded analysis of wood price data and market trends. The report is read by a large group of the international forest industry analysts in over 18 countries and is the only publication which has consistently tracked delivered wood fiber prices and market developments worldwide since 1988.

The report of approximately 40 pages in length include sawlog, pulplog and wood chip prices, as well as market information from all major regions of the world. Reliable price information is presented on a consistent and comparable basis in US dollars and in local currency, making it easy to track developments in all global regions.

The report is available both as hard copy and in PDF format on our web site. If you would like more information about the WRQ, including sample copy of the report, please go to our web site at [www.woodprices.com](http://www.woodprices.com) or feel free to contact us at [info@wri-ltd.com](mailto:info@wri-ltd.com)

### “North American Wood Fiber Review”

The **North American Wood Fiber Review (WFR)**, has been the source for North American wood fiber price data and market information for the forest industry since 1983. The report of approximately 24-page is the *only* publication that consistently provides comparable updates of softwood and hardwood prices, average and range, for all major markets in North America and the Pacific Rim.

The report is a useful information source for anyone that needs to track wood fiber costs, chip trade and fiber consumption by the pulp industry in the most active market in the world.

The report is available both as hard copy and in PDF format on our web site. If you would like more information about the WFR, including sample copy of the report, please go to our web site at [www.woodprices.com](http://www.woodprices.com) or feel free to contact us at [info@wri-ltd.com](mailto:info@wri-ltd.com)

## Partial List of Consulting Assignments

### Timber Supply and Demand

- **Global** Timber Supply and Demand Situation towards 2010 (numerous studies)
- Forecast of Timber Supply and Demand in **US Pacific Northwest**
- Profile of the Global **Eucalyptus** Industrial Plantation Resource and Fiber Supply Forecast

### Wood Fiber Pricing

- Current and Near-term **Wood Fiber Prices** for Selected World Regions
- International Comparative Assessment for Wood Fiber Growing and **Production Costs**
- Assessment of Wood Fiber Cost and Availability for Pulp Mills (numerous studies/regions)

### Market Analysis

- Markets for US Wood Products in the Caribbean Basin
- Markets for Imported **Softwood Lumber** in the US, Europe, and Japan
- European Market for Imported **Hardwood Fiber**
- Forecast of Pacific Rim **Log Export** Markets
- Analysis of South American Markets for **Wood-based Panels**
- Analysis of US Market for Imported **Plywood and Veneer**

### Regional Industry Focus

- Profile of **Chile's** Pine Plantation Industry
- Outlook for **Brazil's** Timber and Softwood Lumber Production
- Markets for Russian Timber in **China**
- Potential Export Markets for **Swedish** Conifer Sawmill Residues
- Investment Promotion for the Forest Products Industries of Khabarovsk Krai, **Russia**
- Due Diligence on Forest Products Port Project in **Uruguay**
- Assessment of the Pulpwood Fiber Situation in **Finland**

### Species Supply/Market Focus

- **Fiber Sourcing** Analysis for the Global Pulp and Paper Industry
- Global Markets for **Eucalyptus** Solid Wood Products
- Forecast of **Radiata** and Other **Southern Hemisphere Pine** Lumber Trends
